

Cross-Chain AI Agentic Solutions for DeFi

Highlights

- Grant from Ava Labs through the AVAX InfraBUIDL program to build foundational AI agent infrastructure.
- Building an AI analytics scanner for the XRPL network.
- 3x ICP Global Hubs hackathon winners.
- Chainlink Hackathon winner, now using CCIP and data feeds for multi-chain token orchestration.
- Deploying our first AI agent on the Morpheus (MOR20) Builders subnet.

Who We Are

Panorama Block is an AI-driven blockchain intelligence infrastructure that transforms fragmented on-chain data into structured, high-fidelity datasets. It integrates proprietary blockchain scanners, AI-powered aggregators, and specialized AI agents to standardize multi-chain data. We are building a foundation of tamper-proof, immutable data that will serve as a bedrock for AI model training and deployment.

The Problem: Cross-chain silos, resource-intensive AI integration, and lack of standardized frameworks in the current agentic economy.

Our Solution: Unified data access layer, decentralized aggregators, AI-driven analytics, and automated strategy deployment with cross-chain integration.

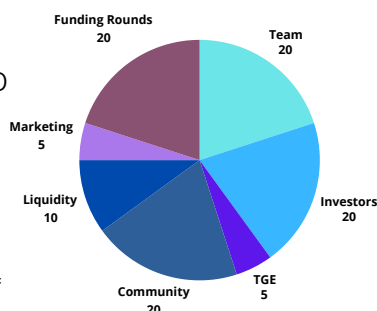

Rounds Overview & Tokenomics

Pre-Seed Round:

- Allocation: 16% (160M tokens)
- Token Price: \$0.0125
- Amount Raised: \$2,000,000
- Implied Valuation: \$12,500,000
- 12-month lock-up
- 6-month linear vesting

Seed Round:

- Allocation: 4% (40M tokens)
- Estimated Token Price: \$0.08*

Key Metrics

- **Fully Diluted Valuation (FDV):** \$80,000,000
- **Initial Market Cap:** \$3,200,000

Our Product Roadmap

Panorama Chain View

Our vertical that aggregates and normalizes multi-chain blockchain data, providing real-time analytics and foundational datasets for training advanced AI models and agents.

AI Marketplace

A collaborative hub for training, deploying, and sharing AI agents tailored to various blockchain applications, designed for both developers and enterprises to create customized agentic solutions.

DeFi Vista

Empowering users to design, optimize, and automate high-yield DeFi plays using AI agents with cross-chain interoperability across multiple protocols, allowing configuration of agents to execute customized strategies with adjustable risk parameters.

Revenue Streams

Panorama Block is a subscription-based model for our on-chain data analytics products and services offering:

- Community Subscription Package: **US\$0/month**
- Entrepreneur Subscription Package: **US\$100/month**
- Enterprise Subscription Package: **US\$500/month**

Additional Revenues: IAPs, enterprise solutions, AI model royalties, take rate on agent and swap transactions, marketplace fees, strategic partnerships, and aggregated data sales.

Proudly Collaborating with:

*Token target value/price, listing timeframe and trading venues are pendant on various external events and information disclosed on this presentation is for discussion purposes only.
