

PANORAMA BLOCK

Generative *AI* for *DeFi*

About Us

Panorama Block is an initiative developed in collaboration with UCLA MASTERS OF QUANTITATIVE ECONOMICS and other leading global universities.

Building composable AI agents to overcome cross-chain silos, simplify AI integration and help onboard the next 1B users to DeFi.

Our Mission

Empower users with intelligent AI agents that automate personalized DeFi strategies across multiple blockchains.

Our Vision

Simplify cross-chain DeFi through improved interoperability, automation, and real-time monitoring.

Collaboration with UCLA and other academic teams globally.

Deployed our first AI agent on the Morpheus (MOR20) Builders subnet.

Winner of 3 hackathons worldwide, awarded a DFINITY developer grant.

Part of the InfraBUIDL program, awarded a grant from Ava Labs.

LatAm Hackathon winner, building institutional RWA analytics through Grants.

London Hackathon winner, now using CCIP/data feeds for multi-chain orchestration

The Problem & Our Solution

Why Now: Fragmented data, resource-intensive AI integration, and complex cross-chain DeFi strategies limit multi-chain DeFi adoption.

The Problem

Cross-chain silos, resource-intensive AI integration, and lack of standardized frameworks in the agentic economy

The Solution

Unified data access layer, decentralized aggregators, AI-driven analytics, and automated strategy deployment with cross-chain integration.

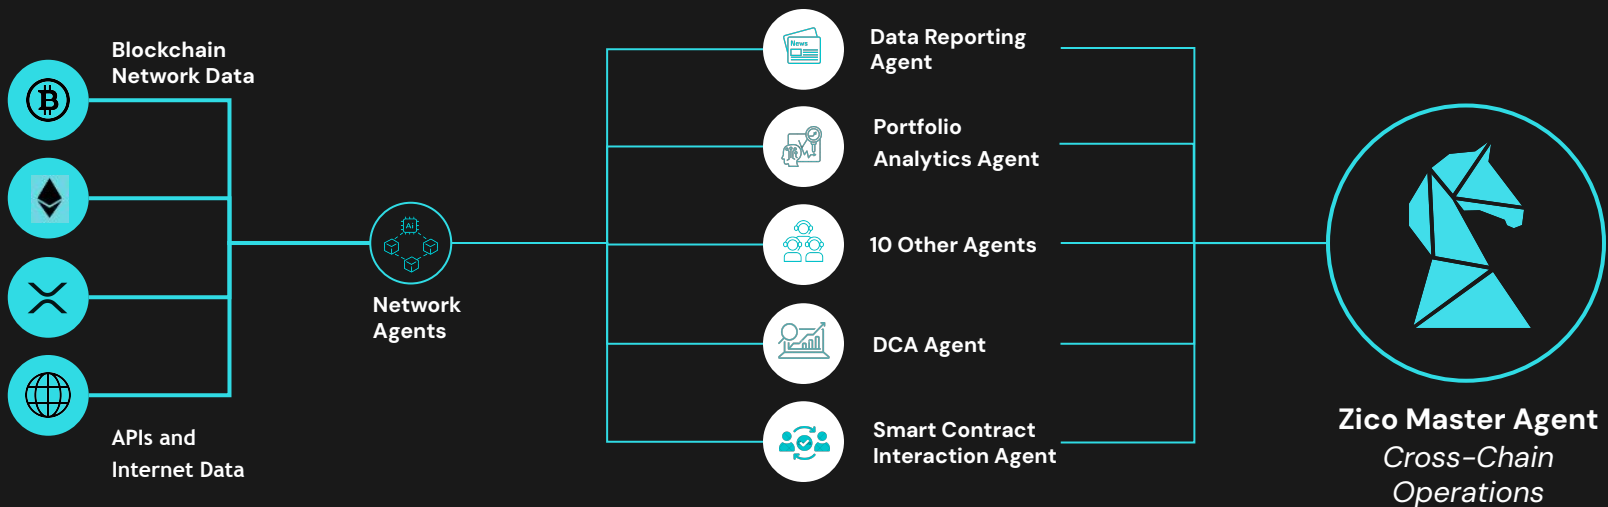

Our Cross-chain Competitive Advantage

- Panorama Block unifies Web2 & Web3 data into a single AI-powered platform, automating DeFi strategies through block-scanner aggregation and tailored APIs.
- Both institutional and retail users access smart insights without manual data work.
- The PANBLK token powers the creation and monetization of AI agents, bots, and APIs on the platform.

Our Edge: A Scalable Multi-Agent Framework

A system integrating multiple agents to process on-chain and off-chain data, enabling adaptable applications across decentralized and traditional ecosystems.

Business Model & Market Opportunity

Panorama Block is a Subscription SaaS/BaaS model to our on-chain data analytics products and services offering:

COMMUNITY

Subscription
Package US\$0 per
month

ENTREPRENEUR

Subscription Package
US\$100 per month
*Pay in Stables or Crypto
(Daily Rate)*

ENTERPRISE

Subscription Package
US\$500 per month
*Pay in Stables or Crypto
(Daily Rate)*

TAM

- **Cross-Chain DEX Volume:** ~\$474.1 billion In May 2025
- **DeFi Management Tools:** \$2B+ market, growing at 200% YoY
- **AI + Crypto:** Emerging category with \$50B+ potential
- **~16 billion Market Cap** (AI Agents Tokens) as of January/2025.

Value Capture

- **Take Rate** of \$0.10 plus 0.05% of the total swap amount on every automated transaction executed by our AI agents.
- **SaaS** Offering for protocols seeking integration
- **Data-as-a-Service** for institutions needing actionable insights

2026 KPIs

25.000+
Total Users

\$500K+
Monthly Revenue

\$250M–300M
Market Cap.

Token Generation Event (TGE)

Token Price at *Pre-Seed Round**

US\$ 0.0125

Total Tokens Allocated:
16% of total token supply
(160,000,000 tokens) reserved for
Pre-Seed Round investors.

Fundraising Target:
\$2 million.
12-month lockup, 6-month linear
vesting.

Token Price at *Seed Round**

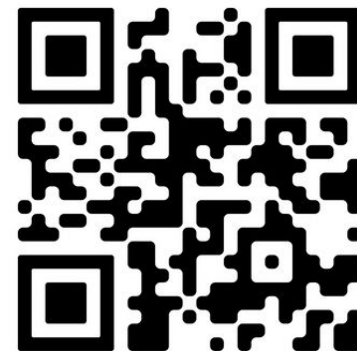

US\$ 0.08

Total Tokens Allocated:
4% of total token supply
(40,000,000 tokens).

Fully Diluted Valuation:
\$80,000,000

Initial Market Cap:
\$3,200,000

**Seed Round
Interest Form**
